Energy Systems

Control Volume Based Modelling of Compressible Flow in Reciprocating Machines
Andersen, Stig Kildegård; Carlsen, Henrik; Thomsen, Per Grove .................................................. 119

Nodal Modelling of Biomass Thermochemical Decomposition
Andrei Vijeu, Razvan; Bellettre, Jerome; Tazerout, Mohand ....................................................... 129

CFD Biomass Two–stage Downdraft Gasifier Modelling: Oxidation–Reduction Zone
Gerun, Luc; Vijeu, Razvan; Bellettre, Jerome; Tazerout, Mohand .................................................. 137

Dynamic Simulation of a Solar Collector Field with Intelligent Distributed Parameter Models
Juuso, Esko; ................................................................................................................................. 145

Computer–based Design Tool for Geothermal Piping Systems
Karlsdottir, Anna; Jonsdottir, Fjola; Jonsson, Magnus Thor .......................................................... 155

Proposal of a Simple Polymer Electrolyte Membrane (pem) Fuel Cell Stages Assessment Method
Lo Mastro, Fabio; Blando, Gandolfo .................................................................................................. 163

Modeling of Solar Radiation on Part Shaded Walls
Naghashzadegan, Mohammad; Nikian, Mohammad ...................................................................... 173

Optimization of the Heat Exchanger Network of a Reforming System
Nielsen, Mads Pagh; Korsgaard, Anders; Kar, Søren Knudsen ....................................................... 181

Calculation of Heat Flow from Buried Pipes Using a Time–dependent Finite Element Model
Persson, Tommy; Wollerstrand, Janusz ............................................................................................. 189

Dynamic Modeling of Domestic Hot Water System Using Simulink
Persson, Tommy; Wollerstrand, Janusz ............................................................................................. 199

Evaluation of Operation Characteristics of the Counter–flow Cooling Tower – Design and Off–design Performance
Shin, Jee–Young; Son, Young–Seok; You, Byoung–Mu .................................................................. 207

Analysis on the Performance of Shell–and–tube Heat Exchangers with Conventional and Spiral Baffle Plates
Son, Young-Seok; Kim, Sung-Kwon; Shin, Jee-Young ..................................................................... 215

Planning of Fuel and Energy Supply in Latvia by Using a Mesap Programming Model
Vostrikovs, Sergejs; Turlajs, Daniels; Kundzina, Antra ..................................................................... 223

Numerical Methods

Numerical Simulation of Combustion in Direct Injection Diesel Engines. Application to Additional Heating Systems
Garnier, Cedric; Bellettre, Jerome; Tazerout, Mohand; Guyonvarch, Gwenaël ................................. 233

Numerical Simulation of Combined Screw Compressor–Expander Machines for Use in High Pressure Refrigeration Systems
Kovacevic, Ahmed; Stosic, Nikola; Smith, Ian K ............................................................................ 241

New Methods for Numerical Investigation of Dynamic Processes
Slopenyisky, Roman; Stolyarchuk, Roksolana .................................................................................... 249

A Numerical Investigation of the Effect of Inlet Position on the Transient Turbulent Flow in a Fuel Oil Storage Tank
Vardar, Nurten; ............................................................................................................................... 255

Mechanical/Electronic Systems

Analysis of Noise in Ventilating and Air–conditioning Systems
Naghashzadegan, Mohammad; Nikian, Mohammad .................................................................... 265
Simulated Stress and Stretch of SWCNT

Proykova, Ana; Iliev, Hristo

Magnetorheological Dampers in Earthquake Protection: a Simulation Study

Stammers, Charles; Guglielmino, Emanuele; D’Ayala, Dina; Stireanu, Tudor; Stanciu, Dana

Rigid- and Soft-body Simulation

Simulation of Liquid–, Deformable– and Rigid–bodies

Boldt, Niels

Analysis of Musculoskeletal Systems in the Anybody Modeling System

Damsgaard, Michael; Rasmussen, John; Christensen, Søren Tørholm; Surma, Egidijus; de Zee, Mark

Contact Graphs in Multibody Dynamics Simulation

Erleben, Kenny; Dohlmann, Henrik

Self-intersection with Cullide

Meyer, Jonas; Boldt, Niels

Ballet Balance Strategies

Pedersen, Camilla; Erleben, Kenny; Sporring, Jørgen

Real-time Simulation of Smoke Using Graphics Hardware

Rørbech, Marinus

Modelling and Simulation Tools

Modelling of Fluid Proprieties in Hydraulic Positive Displacement Machines

Casoli, Paolo; Vacka, Andrea; Franzoni, Germano; Berta, Gian Luigi

Generalized Net Model of Storehouse Processes: a Principal Scheme

Christova, Nikolinka G.; Atanassov, Krassimir T.

Istanbul–Ankara High Speed Train Travel Analysis by Railroad Vehicle Simulation

Guney, Baha; Teymaz, Imdat; Cakir, Kemal; Gundogar, Emin

Modelling of a One Pass Smoke Tube Boiler

Karstensen, Claus M.S.; Sorensen, Kim

Fluid Flow and Particle Deposition Simulations in the Human Nose

Kleven, Marit; Melaaen, Morten; Reimers, Jan Sigurd; Aurdal, Lars; Djupesland, Per G.

Towards Automatic Generation of Model Checkable Code from Modelica

Lundvall, Håkan; Bunus, Peter; Fritzson, Peter

Gridmodelica – a Modelling and Simulation Framework for the Grid

Nyström, Kai; Aronsson, Peter; Fritzson, Peter

The Use of a Zero Dimensional Model in Order to Characterise Knock in Spark Ignition

Gas Engines

Ollivier, Eric; Bellettre, Jerome; Tazerout, Mohand

Pop, Adrian; Fritzson, Peter; Johansson, Olof

A Topology Approach to Modelling

Preisig, Heinz A.

Field Type and Field Constructor in Modelica

Saldamli, Levon; Fritzson, Peter

Modelling, Simulating and Optimizing Boilers

Sorensen, Kim; Condra, Thomas; Niels, Houbak

Author Index
