

Bibliographic References

The bibliographic reference list is shown at the end of the paper; starting with an unnumbered heading "References". The list of references should be sorted in alphabetic order according to the first author's surname.

Citations are stated within the body text by inserting at most two author names and the publication year in parenthesis, such as (Pantelides, 1988) or (Tuffin et al., 2001). Two or more citations can be combined, separated by semicolon: (Pantelides, 1988; Augustin et al., 1967). Only surnames NO firstnames in citations.

If the author names are in the sentence, the citation is the publication year, e.g. Pantelides (1988) presented ..., Juuso and Galar (2016) discussed ..., Augustin et al. (1967) introduced ...

The authors should be given in the following order: Initials of the firstname(s) lastname, use ", and" before the last author if there are more than two authors. For two authors with "and", e.g. "Iain S. Duff and John K. Reid" and "B. Tuffin, D. S. Chen, and K. Trivedi". All the authors should be included in the list of authors. An exception is accepted only if the number of the authors is very extensive. References should be sorted in alphabetic order of the SURNAMES.

The title of the paper should not be in parenthesis. Publication year should be in the end of each reference before doi. "doi:" is enough, "http://dx.doi.org/" is not needed.

For **journal papers**, the volume, issue and pages should be given in form *Journal*, vol(no): pages, year. Journal name in italics and after it ", not "." or ";" or ":". Only numbers, no texts like Vol., No. or pp., note ":". All journal names should be in italic.

Conference papers in Proceedings. All the names of the proceedings should be in italic. Titles should always end with "." continuing with "In Proceedings ...". Proceedings name should be in italics - the paper title should NOT be in italic. Page numbers should be in form ", pages nnn-mmm".

Chapters in research books. Use italics for book titles. Titles should always end with "." continuing with "In ...". Page numbers should be in form ", pages nnn-mmm".

Book, reports and thesis. Use italics for book titles, thesis titles and mark "PhD thesis", "Master's thesis", etc.
